

GEVISPACE

Our GEVISPACE feeding station: a stall that feels safe and secure!

The GEVISPACE has been designed as a long stall enabling each sow to have its own individual space for feeding and thereby avoiding competition at the trough. The GEVISPACE gateway, coupled with the long stall, allows you to isolate one or more sows according to your needs.

Think about fitting our stainless-steel anti-waste trough divider

+ ITS PLUS POINTS

- 1.22 m-long stall, protects the flanks of the sows and keeps them calm
- Railings suited to gestating sows
- Manual locking possibility to block a sow without isolating it from the group
- Quick and easy cleaning (vertical bars + clear space under trough)
- Liftable rear gate saving space to the rear of the sows
- Calm and peaceful atmosphere in the pen

+ MATERIALS

- Horizontal lower bars with no risk of injury for the sows
- Vertical upper bars for safely containing the sow
- Hygienic, durable and anti-corrosion stainless-steel feet
- Trough higher at the rear to limit feed waste and cleaning
