

LACTEK UP

Our LACTEK UP stall is a proven winner

The LACTEK is still a choice you can bank on, even after all these years!

We have now developed its design to produce an elevator stall, enabling you to wean more piglets with reduced surveillance. You want an easy way to protect your piglets? LACTEK UP is just what you need!

+ ITS PLUS POINTS

- Economical
- Scalable and adaptable
- Ergonomic design: 2- or 3-way posts
- Crushing risk reduced thanks to raised stainless-steel frame
- Better access to lower teats, colostrum intake encouraged by raised stainless-steel frame
- Elevator position: high = 27 cm, low = 4 cm
- Wire slatted floor: facilitates elimination of slurry
- Lift stability guaranteed by the horizontal thrust from 4 cylinders

+ MATERIALS

- MIK® plastic floor supporting sow weighing up to 350 kg, high-quality, high-resistance
- Cast-iron slats
- 50 cm-high PVC enclosure, high resistance to shocks and to wear and tear
- Hygienic, durable, anti-corrosion stainless-steel posts
