

QUARANTINE

Quarantine is a prerequisite for all pigs !

This space must be independent and on the outskirts of the livestock buildings with direct access allowing delivery of animals from off the farm and. The size and the number of stalls should be suited to the number of animals, the minimum surface area on full slatted floors being 1.25 m² per animal and 1.8 m² on straw. The quarantine duration is at least 5 weeks with a strict observation phase of at least 10 days.

+ ITS PLUS POINTS
