

# STALL

## LONG

### Our LONG STALL, protection and tranquility !

The LONG STALL can house sows before and after gestation, while avoiding competition during the meals. The long stalls protect the sows' flanks, thus providing additional serenity during the meals.

Think about fitting our stainless-steel anti-waste trough divider

The man's passage enables to go from one pen to another in no time

### + ITS PLUS POINTS

- 75 cm long stall
- Railings suited to gestating sows, avoiding competition at the trough
- One dedicated place for each sow
- Better food intake management
- Animal welfare
- Quick and easy cleaning (vertical bars + clear space under trough)

### + MATERIALS

- Horizontal lower bars with no risk of injury for the sows
- Vertical upper bars for safely containing the sow
- Hygienic, durable and anti-corrosion stainless-steel feet
- Trough higher at the rear to limit feed waste and cleaning
