

# STALL

## SHORT

**Our SHORT STALL ensures peacefulness, for the operator as well as for the animals !**

The SHORT STALL can house sows before and after gestation, while avoiding competition during the meals. Each sow has its own place, giving them all the same chance to get its food portion.

Think about fitting our stainless-steel anti-waste trough divider

The man's passage enables to go from one pen to another in no time

### + ITS PLUS POINTS

- 75 cm long stall
- Railings suited to gestating sows, avoiding competition at the trough
- One dedicated place for each sow
- Better food intake management
- Animal welfare
- Quick and easy cleaning (vertical bars + clear space under trough)

### + MATERIALS

- Horizontal lower bars with no risk of injury for the sows
- Vertical upper bars for safely containing the sow
- Hygienic, durable and anti-corrosion stainless-steel feet
- Trough higher at the rear to limit feed waste and cleaning
